

DISCOVER LIVER KNOWLEDGE AT EVERY TURN

You play a **critical role in identifying liver disease early** and improving patient outcomes, and **AASLD is your trusted source** for the knowledge and resources you need for early diagnosis.

Evidence-based recommendations for diagnosing and managing liver disease. Access AASLD's **most popular guidance for Q1** on:

- Ascites, spontaneous bacterial peritonitis, and hepatorenal syndrome
- Portal hypertension and variceal bleeding
- Chronic hepatitis B treatment
- MASLD management
- Autoimmune hepatitis

As MASLD and MASH conditions become **increasingly common in primary care settings**, staying current on updated terminology, guidelines, and emerging therapies is critical to improving patient care.

Learn how to **screen, diagnose, and manage liver disease** with this free, Unmasking MASH and MASLD online course.

This self-paced Fundamentals of Liver Disease course is an **ideal introduction to hepatology** for those new to the field, covering essential concepts on liver disease, diagnosis, and management to support confident clinical decision-making. All while earning CME credits.

Download patient-friendly materials to **support conversations about liver health** and prevention.

AASLD provides many ways to **connect with the hepatology community**:

- **Liver Fellow Network:** Open-access education platform built for trainees interested in hepatology to learn from and engage with experts and each other.
- **Hepatology Associates Special Interest Group:** Supports associates in optimizing translation of evidence into best clinical practices and delivery of comprehensive patient-centered care.
